📄 SUMMARY

React & Next.js Software Engineer with 2 years of experience building scalable, production-grade web applications including multi-vendor e-commerce platforms, trading systems, and real-time dashboards. Strong expertise in modern Next.js features (Routing, Server Actions, Middleware, SSR/SSG/ISR) and TypeScript. Passionate about clean architecture, performance optimization, and building maintainable systems.

📁 PROFESSIONAL EXPERIENCE

Front End Developer, React.js & Next.js Software Engineer,

12/2024 – Present

NebulaX.UK (Remote)

- Built scalable, high-performance web applications in collaboration with backend and design teams.
- Implemented clean architecture patterns to improve maintainability and separation of concerns.

Multi-Supplier Trading Platform

- Engineered a multi-supplier trading platform with role-based dashboards for administrators and suppliers using Next.js.
- Leveraged Server Actions for secure mutations and automatic data revalidation.
- Implemented refresh token-based authentication and enforced role-based access control using Next.js Middleware.
- Developed a centralized global error handling system to standardize API responses and improve application stability.

Multi-Vendor Pet E-Commerce Platform

- Developed a multi-language, multi-vendor pet e-commerce platform featuring a built-in social forum and dedicated dashboards for admins and vendors.
- Implemented SSG, SSR, and ISR to optimize performance and SEO.
- Integrated authentication with NextAuth, internationalization with next-intl, and real-time communication via Socket.io.
- Enabled browser push notifications using Firebase Cloud Messaging and Service Workers.
- Improved large dataset rendering performance using TanStack Virtual and SWR for efficient data fetching.

Tranzita Dashboard

- Built a multi-role dashboard for the Tranzita application using React.js, TypeScript, Tailwind CSS, and TanStack Query.
- Integrated Socket.io for real-time support chat and Recharts for interactive analytics visualizations.

Tranzita Marketing Landing Page

- Developed a fully responsive, multi-language landing page for the **Tranzita** 📱 app, improving SEO and marketing conversion rates.

TECHNICAL SKILLS

Front-End

Next.js (App router), React.js, React-router, Typescript, Javascript, HTML, CSS, Tailwind CSS, SASS, Styled Components.

Forms & Validation

React Hook Form, Formik, Yup, Zod.

Backend & Fullstack Concepts

NextAuth, Server Actions, REST APIs, Supabase, Authentication (JWT, Refresh Tokens, Cookie-based Auth)

Testing

Jest, React testing library.

Tools & Others.

Git & Github, Axios, VSCode, Postman, Claude.

State Management & Data fetching

Tanstack Query, SWR, Redux & RTK, Context API.

Internationalization

Next-Intl

Real-time & Performance

Socket.io, Tanstack Virtual, Performance Optimization.

Software Engineering Practices

Clean Architecture, SOLID Principles, Separation of Concerns, Design Patterns, Modularity & Reusability

Certificates

- React Testing Library and Jest (Udemy) 
- React developer (Hackerrank) 
- Javascript intermediate (Hackerrank) 
- Git & Github (Almadrasa) 
- Algorithms (Udemy) 
- Jonas's React & Next.js Course (Udemy) 
- Front-End diploma (Route Academy) 
- JavaScript Basics (Hackerrank) 
- Database fundamentals (MaharaTech) 
- Data Structures (Udemy) 

EDUCATION

Assiut University, Bachelor's degree in computers and information (Software Engineering dep.)

09/2019 – 07/2023

Accumulative GPA 3.75 / 4.0 (Excellent with honor), ranked second in the department

PERSONAL SKILLS

- Self-learning
- Accuracy
- Time-management
- Team-working

LANGUAGES

- Arabic
- English
